SUMMARY

Computer Engineering student with hands-on experience building a Unity game, an Android app, and a React web portfolio. Strong foundation in data structures and algorithms; seeking a software development internship.

EDUCATION

Thapar Institute of Engineering and Technology (Deemed to be University) Expected Jun. 2029
Bachelor of Engineering (B.E.) in Computer Engineering, CGPA: 8.0/10 *Punjab*

Peace Public School May 2025
Class 12 (CBSE) - 90.4% *Ludhiana*

Peace Public School May 2023
Class 10 (CBSE) - 91.4% *Ludhiana*

SKILLS

Programming Languages: C, C++, C#, Python, Kotlin, TypeScript
Web Technologies: React, Tailwind CSS, HTML, CSS
Mobile & Game Development: Android Studio, Jetpack Compose, Material Design, Unity
Tools & Platforms: Git, GitHub, AI-Assisted Development, Prompt Engineering
Core Concepts: Data Structures and Algorithms (C++), Object-Oriented Programming

PROJECTS

3D Cube Runner Game | *Unity, C#* GitHub

- Built a 3D endless runner game in Unity with 5 core systems: player movement, obstacle avoidance, collision detection, progressive difficulty, and live score tracking
- Implemented 3 gameplay mechanics in C#: smooth camera follow, procedural obstacle spawning, and responsive player controls
- Optimized object handling and game logic to maintain smooth real-time performance

Smart Login Application | *Kotlin, Jetpack Compose, Material Design* GitHub

- Developed an Android login app with 3 interactive features: password visibility toggle, real-time email and password validation, and dynamic login button state
- Managed UI state with Jetpack Compose State to validate 2 input fields (email and password) instantly and optimized keyboard input handling
- Designed a responsive, user-friendly interface with reusable Material Design components following modern Android practices

AI-Assisted Personal Portfolio | *React, TypeScript, Tailwind CSS* Live Demo

- Built and deployed a responsive personal portfolio website using 3 modern web technologies: React, TypeScript, and Tailwind CSS
- Leveraged AI agents and iterative prompt engineering across 5 development stages: UI design, code generation, debugging, feature integration, and deployment

EXPERIENCE

Core Member Sep. 2026 – Present
Markfin Society

- Proposed and designed creative concepts for society events and initiatives to boost participation
- Created content and promotional material to publicize events and drive student engagement
- Collaborated with a team to plan, coordinate, and execute events

Member Sep. 2025 – Aug. 2026
Thapar Mathematical Society

- Coordinated content creation and student outreach for society events and campaigns
- Worked with team members on event planning, scheduling, and management
